Network dependency tree

Avoid chaining critical requests by reducing the length of chains, reducing the download size of resources or deferring the download of unnecessary resources to improve page load. LCP Unscored

Maximum critical path latency: **2,619 ms**

Initial Navigation

- https://tradebd.online - **1,275 ms,** 6.34 KiB
  - /assets/index-CdpP0Ga5.js (tradebd.online) - **2,616 ms,** 54.54 KiB
  - /assets/index-CQ76pKUM.css (tradebd.online) - **2,619 ms,** 10.76 KiB

Preconnected origins

preconnect hints help the browser establish a connection earlier in the page load, saving time when the first request for that origin is made. The following are the origins that the page preconnected to.

Origin	Source
https://fonts.googleapis.com/	head > link `<link rel="preconnect" href="https://fonts.googleapis.com">`
https://fonts.gstatic.com/	head > link `<link rel="preconnect" href="https://fonts.gstatic.com" crossorigin="">`

Preconnect candidates

Add preconnect hints to your most important origins, but try to use no more than 4.

No additional origins are good candidates for preconnecting

Optimise DOM size

A large DOM can increase the duration of style calculations and layout reflows, impacting page responsiveness. A large DOM will also increase memory usage. Learn how to avoid an excessive DOM size. Unscored

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

ADDITIONAL ITEMS TO MANUALLY CHECK (10) Hide

- The page has a logical tab order
- Visual order on the page follows DOM order
- User focus is not accidentally trapped in a region
- The user's focus is directed to new content added to the page
- HTML5 landmark elements are used to improve navigation
- Offscreen content is hidden from assistive technology
- Custom controls have associated labels
- Custom controls have ARIA roles

These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.
